

THE MORNING LAUNCH SYSTEM™

Executive Function Scaffolds & AI Scripts for Neurodivergent Families

A 'Build-It-Yourself' Prompt Library

COPY/PASTE INTO CHATGPT:

Act as an Executive Function Coach. Help me build a morning routine for a child with [ADHD/Autism] who struggles with [Specific Task].

Operationalizing the morning to reduce chaos, friction, and decision fatigue.

How to Use This Generator

STOP. This is not a book to read.

This is a **Prompt Library**. It contains 'Magic Spells' (Prompts) that you feed into an AI (like ChatGPT or Claude) to generate custom plans for your family.

The Protocol:

1. **Identify the Pain Point:** Look at the Menu on the next page.
2. **Find the Tool:** Go to that page.
3. **Copy the Box:** Copy the text in the Grey Box.
4. **Paste into AI:** Paste it into ChatGPT and fill in your details.
5. **Get the Solution:** The AI will write your custom script/checklist.

The Troubleshooting Menu

Where is the bottleneck right now?

If YOU are losing your temper...	Go to Section 1 (The Oxygen Mask)
If they won't get out of bed...	Go to Section 1 (Wake Up)
If clothes hurt or cause fights...	Go to Section 2 (Dressing)
If hygiene is boring/ignored...	Go to Section 3 (Hygiene)
If you are running late...	Go to Section 4 (Time)
If they miss the bus...	Go to Section 4 (The Bail-Out Plan)

Section 1: Wake Up & Regulation

Tool 00: The Oxygen Mask (Parent Regulator)

Best Used When: You are about to yell before you even enter their room.

COPY/PASTE INTO CHATGPT:

I am feeling dysregulated and angry this morning. Give me a 30-second 'Oxygen Mask' visualization or breathing exercise I can do right now to lower my cortisol before I wake up my child. I need to be the calm pilot, not the storm.

Parent Note: A dysregulated parent cannot regulate a dysregulated child.

Tool 01: The Dopamine Bridge

Best Used When: Sleep inertia makes waking up painful.

COPY/PASTE INTO CHATGPT:

My child struggles with Sleep Inertia. Suggest 3 small, high-interest 'Dopamine Bridge' activities (like audiobooks, specific music, or pet time) to insert before they have to get out of bed. NOTE: Do NOT suggest video games or screens, as that creates a 'Screen Suck' trap.

Parent Note: You cannot drive a car with a cold engine. Warm it up first.

Tool 02: The Sensory Wake-Up Menu

Best Used When: Yelling 'Wake Up' causes a meltdown.

COPY/PASTE INTO CHATGPT:

My child is sensory sensitive. Suggest 5 non-verbal, gentle ways to wake them (e.g., smell of toast, opening curtains slowly, pressure massage) that gently activate the brain without startling it.

Parent Note: Waking up shouldn't feel like an air raid siren.

Tool 03: The Human Burrito (Deep Pressure)

Best Used When: They refuse to leave the blankets.

COPY/PASTE INTO CHATGPT:

Give me a playful script for 'Unrolling the Burrito' to physically help my child out of bed. IMPORTANT: For an older child, frame this as 'Deep Pressure Therapy' and ensure I ask for consent first.

Parent Note: Laughter wakes up the brain faster than nagging.

Section 2: Dressing Systems

Tool 09: The Night-Before Launchpad

Best Used When: Morning decisions cause fatigue.

COPY/PASTE INTO CHATGPT:

Create a 'Night-Before Clothing Ritual' checklist. It must cover: checking weather, choosing outfit (including socks), and laying it out in a 'ready to wear' shape on the floor.

Parent Note: Morning You will thank Evening You.

Tool 11: The Choice Architecture Script

Best Used When: Open-ended choices cause paralysis.

COPY/PASTE INTO CHATGPT:

My child takes forever to choose. Give me a script to offer 'Limited Choices' (e.g., 'Red shirt or Blue shirt?'). Explain how to present this so it feels like freedom, not control.

Parent Note: Unlimited choice is paralysis. Limited choice is freedom.

Tool 15: The Steve Jobs Strategy (Uniforms)

Best Used When: They only want to wear one thing.

COPY/PASTE INTO CHATGPT:

My child wants to wear the same type of clothes every day. Give me a strategy to buy multiples of this 'Safe Outfit' to create a personal uniform and eliminate the battle.

Parent Note: Einstein wore the same suit every day to save brainpower.

Section 3: Hygiene & Fuel

Tool 21: The Protein First Strategy

Best Used When: They are 'hangry' and unfocused.

COPY/PASTE INTO CHATGPT:

I suspect low protein is affecting my child's ADHD. List 5 'Grab and Go' high-protein breakfast items (e.g., cheese stick, hard-boiled egg). HACK: Include shelf-stable items like beef sticks that can live on their nightstand.

Parent Note: Protein is the building block of dopamine.

Tool 17: The Toothbrushing DJ

Best Used When: Brushing teeth is boring and ignored.

COPY/PASTE INTO CHATGPT:

Toothbrushing is a fight. Suggest the 'DJ Toothbrush' method where we play a specific 2-minute song. Give me a script to introduce this rule.

Parent Note: Music fixes time blindness.

Tool 24: The Visual Sequence Strip

Best Used When: You repeat the same 4 instructions every day.

COPY/PASTE INTO CHATGPT:

Create a text description for a 'Morning Visual Strip' with 4 icons: Toilet, Teeth, Clothes, Face. Explain how I can tape this to the mirror to replace my voice.

Parent Note: Visuals are permanent; words are temporary.

Section 4: Time & Transitions

Tool 25: The Analog Clock Visualizer

Best Used When: '10 minutes' means nothing to them.

COPY/PASTE INTO CHATGPT:

My child has time blindness. Explain how to use an Analog Clock and dry-erase markers to color in 'Time Wedges' (e.g., Red Wedge = Getting Dressed Time) so they can SEE time passing.

Parent Note: To them, time is invisible. You have to make it visible.

Tool 27: The Playlist Timer

Best Used When: Timers cause anxiety.

COPY/PASTE INTO CHATGPT:

Help me build a 'Morning Playlist'. Suggest a structure: 3 calm songs for waking, 3 upbeat songs for dressing, and 1 'Hurry Up' song for shoes.

Parent Note: Music speaks to the motor center of the brain.

Tool 32B: The Bail-Out Plan (Emergency)

Best Used When: The routine failed and the bus is gone.

COPY/PASTE INTO CHATGPT:

We missed the bus and everyone is crying. Give me a 'Bail-Out Protocol' checklist. It needs to include: 1. A Reset Breath. 2. A 'No Shame' rule for the car ride. 3. A plan to get to school late but regulated.

Parent Note: A late child is better than a shamed child.

Section 5: Emotion & Systems

Tool 35: The Panic Button Reset

Best Used When: Everyone is yelling.

COPY/PASTE INTO CHATGPT:

The morning is a disaster. Give me a 'Reset Button' script to physically stop everyone, breathe, and say: 'We are starting over from right now.'

Parent Note: It is never too late to restart.

Tool 47: The Launchpad Station

Best Used When: Shoes and backpacks are lost daily.

COPY/PASTE INTO CHATGPT:

Help me design a 'Launchpad' by the door. What specific items (hooks, baskets, visuals) do I need so that it is impossible to lose shoes?

Parent Note: A place for everything means everything is in its place.

APPENDIX: VISUAL TOOLS

Print, Cut, and Use.

Tool 25 Template: The Time Wedge Clock

Use a marker to color in the 'Wedge' of time left.

Tool 24 Template: Visual Sequence Icons

TOILET	TEETH
CLOTHES	FACE
