

NAVIGATOR KIDS

WHISPER'S COZY FIELD GUIDE

A Manual for Super-Sensors

EXPLORER NAME: _____

(Sign gently, like a whisper)

WARNING: This book is for kids who feel things deeply.

The Story of Whisper

Meet Whisper.

*Whisper is a bunny with **Super Ears**. Whisper hears everything. The hum of the fridge. The scratch of a tag on a shirt. The bright lights in the grocery store.*

*Usually, this is a Super Power. Whisper can hear a leaf fall! But sometimes, the world feels **TOO LOUD** and **TOO BRIGHT**.*

When that happens, Whisper's brain feels like a shaken-up soda bottle. The bubbles are fizzing up to the top!

*This is called being **Overwhelmed**.*

YOUR TURN: DRAW THE STATIC

What does it feel like when the world is 'Too Much'? Is it a tangled knot? A siren? Static on a TV? Draw it here.

Mission: Find the Calm

Whisper's soda bottle is about to pop! She needs a Calm Guide (YOU) to help her settle down.

STEP 1: PLAY THE GAME

Open 'Whisper's Cozy Cottage' on the computer.

Help her check her Volume Dial, build a Cocoon, and find calm.

Did you help Whisper?

☐ YES! I built the cocoon!

☐ YES! The bubbles went down!

Now, let's build YOUR Cozy Toolkit.

TOOL 1: THE VOLUME DIAL

Your body has a secret dial. It tells you how much energy you have inside.

CHECK YOUR DIAL:

GREEN (Low)	YELLOW (Medium)	RED (High)
Calm & Ready	Starting to wiggle	TOO MUCH!

MARK YOUR SPOT:

*Draw an arrow showing where your volume is RIGHT NOW.
Color the zone.*

TOOL 2: MY COZY COCOON

When the world is too loud, you need a safe spot to recharge.

BUILD YOUR FORT:

Circle the items you want in your real-life cocoon:

☐ Soft Stuffie	☐ Headphones
☐ Favorite Book	☐ Sunglasses
☐ Good Smells	☐ Heavy Blanket

DRAW YOUR SPOT:

Where is your hiding spot? Under a table? In a closet? Draw it here.

TOOL 3: GENTLE GROUNDING

Use your 4 Senses to stop the spinning feeling.

■ SEE	Find 1 thing that is your favorite color.
■ HEAR	Find 1 quiet sound (like a fan or birds).
■ TOUCH	Find 1 thing that feels soft or smooth.
■ SMELL	Find 1 smell (or just breathe the air).

Try this when you feel 'floaty' or dizzy!

TOOL 4: USE YOUR WORDS

It is brave to ask for help when things are too much.

THE BRAVE SCRIPTS:

1. *'It is too loud. Can I use my headphones?'*

2. *'I need a break. Can I go to my Cozy Spot?'*

3. *'Please turn the lights down.'*

PARENT GUIDE: SENSORY SCIENCE

Why the 'Cozy' approach works.

1. Interoception (The Volume Dial)

Sensory kids often don't notice they are overwhelmed until it's too late. The 'Dial' teaches them to check their internal state explicitly.

2. Environmental Control (Cocoon)

Anxiety often stems from a lack of control. Letting a child build a 'safe space' gives them agency over their environment.

3. Sensory Grounding

When the brain is in 'fight or flight', logic turns off. Sensory input (touch, smell) bypasses logic and speaks directly to the nervous system to calm it down.

WHISPER'S POCKET KIT

Instructions: Cut these out and keep them in your pocket.

■■ CHECK YOUR DIAL

1. Stop.
2. Close Eyes.
3. Am I Green, Yellow, or Red?

■ QUICK GROUNDING

- Find 1 Color
- Touch 1 Soft Thing
- Hear 1 Quiet Sound

OFFICIAL COZY CERTIFICATE

This certifies that

**Is a Master of Sensory Secrets
and a friend to Whisper!**

"I listen to my body!"
