

THE HOMEWORK NAVIGATION TOOLKIT™

A Prompt Library for Neurodivergent Families

Turning 'Battleground' into 'Done'.

COPY/PASTE INTO CHATGPT:

Act as an Executive Function Coach. My child is paralyzed by [Assignment]. Break it down into 5 'Micro-Steps' so small they cannot fail.

How to Use This Generator

STOP. Do not read this cover to cover.

This is not a book. It is a **Prompt Engine**. You don't need to learn the theory; you just need to copy the code.

The Protocol:

1. **Identify the Mode:** Use the menu to find where you are stuck.
2. **Select the Tool:** Go to that page.
3. **Copy the Box:** Enter the text from the Grey Box into AI.
4. **Execute:** Follow the plan the AI generates.

The Navigation Menu

What mode are we in right now?

Mode 0: The Crash	After-School Meltdowns
Mode 1: The Freeze	We Can't Even Start
Mode 2: The Drift	They Won't Stay Focused
Mode 3: The Explosion	Tears & Perfectionism
Mode 4: The Mess	Disorganized & Lost Papers
Mode 5: The Fight	Ruining Our Relationship
Mode 6: The Teacher	Advocacy & Emails

Mode 0: The After-School Crash

Use when: They explode the moment they get in the car.

Tool 01: The Decompression Protocol

COPY/PASTE INTO CHATGPT:

My child has 'Restraint Collapse' after school. Design a 30-minute 'Sensory Reset Ritual' for when they get home. Rules: No questions, no demands, high sensory regulation (snacks/heavy work). Give me a script to protect this time.

Parent Note: Do not ask 'How was your day?' until their eyes un-glaze.

Mode 1: We Can't Even Start

Use when: The task looks too big.

Tool 02: The Task Chunker (Micro-Steps)

COPY/PASTE INTO CHATGPT:

My child is paralyzed by [Assignment]. Act as an Executive Function Coach. Break this down into 7 'Micro-Steps' so small they feel easy. The first step must take less than 2 minutes.

Parent Note: The hardest part of physics is overcoming static friction.

Tool 03: The Dopamine Menu

COPY/PASTE INTO CHATGPT:

Create a 'Dopamine Menu' of quick, high-energy activities (under 5 mins) to use as study breaks. They must be engaging but NOT 'doom scrolling' (e.g., wall pushups, dance to 1 song, pet the dog).

Tool 04: The Silent Partner (Body Double)

COPY/PASTE INTO CHATGPT:

Explain the concept of 'Body Doubling' to my child. Give me a script to offer my presence: 'I will sit here and read my book while you work, just so your brain knows it's not alone.'

Mode 2: They Won't Stay Focused

Tool 05: The Brown Noise Generator

COPY/PASTE INTO CHATGPT:

Explain to my child why 'Brown Noise' helps ADHD brains focus (calms the nervous system). Provide a link to a good playlist and a script to try it as an experiment.

Tool 06: The Distraction Parking Lot

COPY/PASTE INTO CHATGPT:

My child gets distracted by random thoughts. Help me create a 'Distraction Parking Lot' sheet. Explain the rule: 'If you have a thought, park it here and we will look at it later.'

Tool 07: The Visual Blinder

COPY/PASTE INTO CHATGPT:

My child gets overwhelmed seeing a whole page of math problems. Suggest a physical 'Masking' technique using sticky notes or paper to show only one problem at a time.

Mode 3: They're Melting Down

Tool 08: The 'I'm Stupid' Recovery

COPY/PASTE INTO CHATGPT:

My child is crying and saying 'I'm stupid' over a mistake. Act as a compassionate Child Therapist. Give me a script to reframe the mistake as a 'Data Point' or 'Glitch,' not a character flaw.

Parent Note: A frustrated brain cannot learn. Stop and regulate.

Tool 09: The Scribe Method

COPY/PASTE INTO CHATGPT:

My child knows the answers but hates writing. Give me a script to offer to be their 'Secretary.' 'You be the Director, I'll be the Writer. You talk, I type.' Explain why this is okay.

Tool 10: The 'Good Enough' Standard

COPY/PASTE INTO CHATGPT:

My child is erasing their work repeatedly (Perfectionism). Give me a script to introduce the 'Draft Mode' rule: 'Homework is practice, not the final game. It doesn't have to be perfect; it just has to be done.'

Mode 4: Everything is Disorganized

Tool 11: The Friday Excavation (Backpack Dump)

COPY/PASTE INTO CHATGPT:

Gamify the backpack cleanout. Create a protocol called 'The Friday Excavation.' We are archaeologists digging for lost artifacts (papers) and removing debris (trash). Keep it non-judgmental.

Tool 12: The Monday Map (Sunday Scaries)

COPY/PASTE INTO CHATGPT:

My child has Sunday Night Dread. Create a 'Monday Map' visualization. We will preview the exact schedule of tomorrow so the brain feels safe. What questions should I ask?

Tool 13: The Station Layout

COPY/PASTE INTO CHATGPT:

Describe an ideal physical 'Homework Station' for a [Left/Right Handed] ADHD child who needs to fidget. What supplies should be within arm's reach to prevent getting up?

Mode 5: Ruining Our Relationship

Tool 14: The Consultant Shift

COPY/PASTE INTO CHATGPT:

I am nagging too much. Give me a script to resign as 'Police Officer' and apply for the job of 'Consultant.' 'I am available to help if you hire me, but I am not the boss of your homework.'

Tool 15: The Peace Treaty

COPY/PASTE INTO CHATGPT:

Draft a 'Homework Peace Treaty.' Clauses: 1. When we start. 2. When we take breaks. 3. What happens if we start yelling (Ceasefire Protocol).

Mode 6: Teacher Advocacy Scripts

Use these when the load is too heavy.

Tool 16: The 'Volume vs. Health' Email

COPY/PASTE INTO CHATGPT:

Draft a collaborative email to the teacher. State that the volume of homework is affecting my child's mental health and sleep. Ask to prioritize 'Quality over Quantity' (e.g., doing every other problem to prove mastery). Tone: Partnership, not complaint.

Tool 17: The Scribing Accommodation

COPY/PASTE INTO CHATGPT:

My child has Dysgraphia. Draft an email explaining that I acted as a scribe (they dictated, I wrote) for last night's assignment to separate the cognitive load from the motor demand. Request that this be an accepted accommodation moving forward.

Tool 18: The 'Mental Health Exemption' Note

COPY/PASTE INTO CHATGPT:

Write a note to the teacher explaining that we skipped homework last night due to a family crisis/meltdown. 'We prioritized emotional regulation over the worksheet to ensure he is ready to learn today.'

APPENDIX: VISUAL TOOLS

Tool 06 Template: Distraction Parking Lot

Print this out. When a random thought pops up, park it here.

PARKING SPOT 1	PARKING SPOT 2
PARKING SPOT 3	PARKING SPOT 4
